STANLEY®

A STORY BEHIND EVERY TOOL

Our History

Proud of our past

The Stanley Works, originally a bolt and door hardware manufacturing company located in New Britain, Connecticut, was founded in 1843 by Frederick Trenck Stanley.

A few years later, in 1857, Frederick's cousin, Henry Stanley, founded The Stanley Rule and Level Company. In 1920, The Rule and Level Company merged with The Stanley Works and would go on to become its famous Hand Tools Division.

Focused on our future

Over the years, The Stanley Works has produced some of the most innovative and useful tools ever made. Among these tools are the Bailey® Plane, the Surform® shaper, the PowerLock® tape rule and most recently the FatMax™ line of products.

Today, more than ever, Stanley continues to be an industry leader in tool innovation. Stanley introduces more than 200 new products per year, bringing to 1000 the number of new products introduced in the past five years.

Since Frederick Trenck Stanley started making tools back in 1843, we've been in the business of making them the best they can be. It's what we do, it's how we work and it's probably why we're the world's largest tool company.
